

## **Postdoctoral Position – RNA biology**

### **University of California, Riverside**

We are looking for a talented and motivated Postdoctoral Researcher to work on the molecular biology of highly conserved ribozymes.

Two postdoctoral positions are available in the laboratory of Dr. Jernej Murn in the Department of Biochemistry at the University of California, Riverside. Projects will focus on the molecular biology of RNase P, one of only two ribozymes that are found in organisms from all kingdoms of life. These projects will involve biochemical and transcriptome-wide approaches, CRISPR-mediated genome editing, proteomics, high-resolution microscopy, tissue culture, and use of transgenic organisms.

A successful candidate will have a strong background in biochemistry and molecular biology. Prior training in RNA biology and/or bioinformatics is desirable. For more information about the lab, please visit <https://www.murnlab.info/>.

The positions are available starting immediately. Interested applicants should send their curriculum vitae and contact information of three referees to Dr. Murn at [jernej.murn@ucr.edu](mailto:jernej.murn@ucr.edu).
